

4.3 PROGRAM

```
#include <Servo.h> //Install this library

Servo tap_servo;

int sensor_pin = 5; //Connect D5 of Arduino
int tap_servo_pin =4; //Connect D4 of Arduino
int val;

void setup(){
    pinMode(sensor_pin,INPUT);
    tap_servo.attach(tap_servo_pin);
}

void loop(){
    val = digitalRead(sensor_pin);

    if (val==0)
    { tap_servo.write(0);
    }

    if (val==1)
    { tap_servo.write(90); //If you want you can increase & Decrease servo rotation
    }
}
```
